

DOMINION®

DS-V9

'Superb Stage and Studio Microphone' Cardioid-Electret Condenser

"Full Frequency Reproduction, Low Noise, Exceptional Detail"

The Dominion Series microphone and accessory products are made with the institutional and commercial applications environments in mind. Houses of Worship, Courthouses, Schools and other similar facilities require special considerations during the product development phase, such as multiple end-user requirements, frequent use and storage, safety, and operational performance optimized for public address functions. Equation Audio not only considers where these products are going, but remains ever mindful of the related budgets.

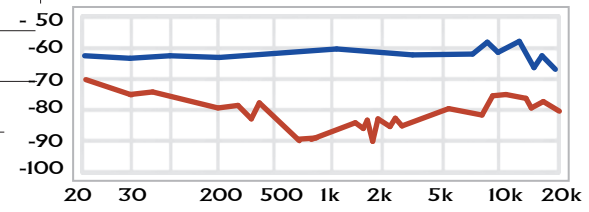

The DS-V9 exhibits an exceptional ability to reproduce detail and transient signal artifacts, a great characteristic generally attributed to studio microphones. This articulate cardioid-electret mike also features a proprietary, low-noise, head amplifier and a multi-point, shock mount for effective isolation from handling and mechanical noises.

The mid-diameter, graded electret capsule achieves a full and robust frequency response without amplifying localized mechanical noises because it is carefully fitted to the isolation device, thus allowing operation at relatively high levels of gain and sensitivity.

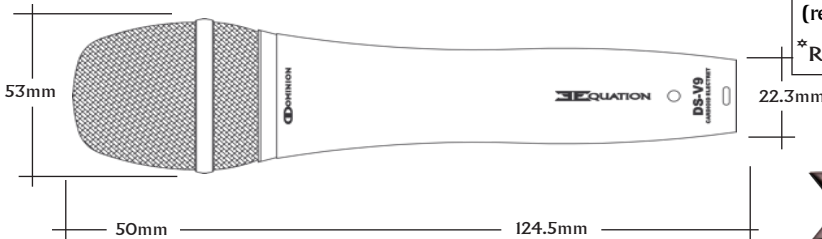

The DS-V9 has excellent side to side discretion and back to back rejection, along with substantial SPL capability.

You won't find a higher quality, better performing cardioid-electret microphone anywhere else under any other brand name that will deliver this much quality and performance for the same or less cost!

The advantage of this unique convergence of advanced design engineering and efficient production, make the Dominion Series products perform well in a recording studio, yet maintain the signal integrity and performance demands of the live and touring environments. The deliberate incorporation of balanced design considerations make this microphone a sure choice wherever a quality handheld condenser microphone is needed. Join the growing number of end-users who understand the Equation slogan ...

... 'Beyond Equal'

| Specifications: | | Uni-Directional Dynamic |
|--|----------------|-------------------------|
| SENSITIVITY: | -62 3dB | Body Material: Zinc |
| IMPEDANCE: | 800 OHM 30% | Screen Material: Steel |
| FREQUENCY RESPONSE: | 30 - 18K Hz* | Head-Amp: Ytronics |
| SPL: | 129dB | Power: Phantom 9v-52v |
| POLARITY | PIN 2 POSITIVE | Connector: XLR |
| (referenced to pin 3 w/ + pressure on diaphragm) | | Net Weight: 246g/8.7oz. |
| *Rated at 3dB - 6dB (20Hz-20kHz) | | |
